

NICE Justice for Prosecutors

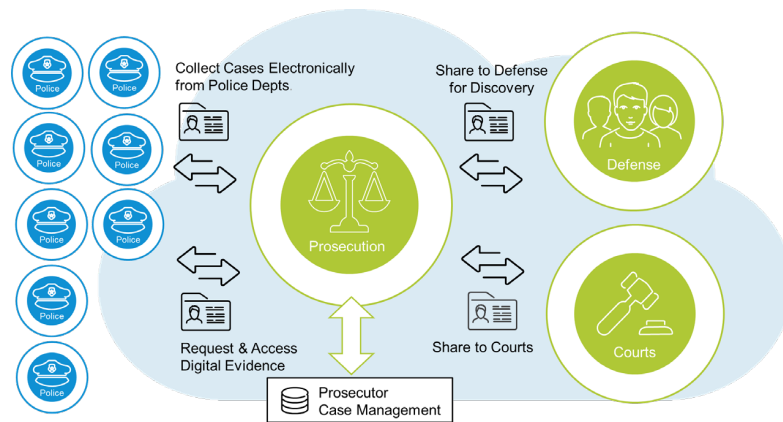

Digital Evidence Management

Accelerating growth in the volume and variety of digital evidence impacts your ability to collect, preserve, analyze and disclose it.

Different police departments share evidence in different ways – as a mix of electronic media, discs, USB drives and paper. This requires a significant amount of manual effort to catalog, consolidate, organize and properly disclose it. With all this complexity, crucial evidence can be missed, hindering cases and delaying justice.

What is NICE Justice?

NICE Justice is the Microsoft Azure Gov cloud-based solution that breaks down information silos and brings all needed information right to the prosecutor, seamlessly integrating with your existing case management system.

“Our County has elected to employ the NICE Justice SaaS solution for digital investigation and evidence management as a tool to assist with compliance with New York’s new discovery reform laws.”

“State law afforded the County less than eight months to implement solutions and this technology is helping to do so on the timeline required by state statute.”

Chief Technology Officer
District Attorney’s Office in the
State of New York

Securely Collect Evidence from Law Enforcement Agencies

- Bring evidence from disjointed agencies into a central repository
- Effectively request additional evidence from police and citizens
- Auto-convert media into standard format for universal access

Evidence gathering no longer a culprit in delayed case resolution

Prepare Exhibits for Court Presentation

- Rapidly search and connect all types of evidence, visualize context on maps and timelines
- Document, Audio and Video redaction tools to protect private information
- Auto-transcription of Audio / Video exhibits for court review and sharing

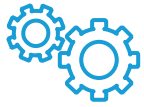

Prosecutors become more effective in pursuit of justice

Securely Share Evidence for Discovery

- Share hundreds of different evidence items with a few clicks
- The burden of making physical copies of digital evidence is lifted
- Comprehensive chain of custody is tracked automatically

Prosecutor office operations gain greater overall efficiency

How NICE Justice Promotes Operational Improvements

Streamlined evidence management workflows result in operational improvements and improved evidence integrity

- Rapid, single logon access to all evidence and cross-case search and analytics improves operational efficiency
- Electronically collect case evidence, improve access control and case management
- Eliminate time wasting moving of physical files from removable media into case folders
- Benefit from court cost savings as a result of faster case resolution

Cloud-based solution improves operational agility and accessibility of information

- Hosted on Microsoft Azure Gov, NICE Justice makes all types of evidence readily accessible
- NICE's SaaS (Software as a Service) solution limits the up-front hardware and resource costs associated with premise-based storage alternatives

Certified CJIS compliant platform eliminates security concerns

- NICE and Microsoft Azure Government meet the security requirements for federal, state and local governments as defined by FBI's CJIS policy
- ISO/IEC 27001:2013 certification, antivirus and malware protection

- Streamlines collection of digital evidence with auto-correlation to case management
- Ensures case data integrity by synchronizing case folder data from case management system with incident ID from Police CAD and RMS
- Police case evidence is shared and organized into the appropriate NICE Justice case folders
- All digital evidence is made searchable to support cross-case matching
- Auto-notifications as new evidence is added to your case prevents missed evidence
- Streamlined sharing of evidence with Defense improves speed and transparency
- Full tracking of shared evidence reveals when Defense receives and reads it

Why NICE?

Leveraging 30+ years of experience helping thousands of public safety and justice agencies manage their digital evidence, NICE has developed the industry's first end-to-end digital investigation and evidence management solution. Running on the Microsoft Azure cloud, NICE Justice automates the collection, analysis and sharing of ALL digital evidence, to enable swifter justice.
